Office Action Summary

Art Unit: 1761

### **DETAILED ACTION**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to an extruder, classified in class 425, subclass 208.
- II. Claims 13 and 14, drawn to a process for manufacturing frozen food product, classified in class 426, subclass 524.

The inventions are distinct, each from the other because:

Inventions of Group II and Group I are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Group I as claimed can be used to practice another and materially different process, e.g., for use in molding non-edible materials such as plastic resins. See U.S. Patent No. 3,954,366 submitted with the January 8, 2001 Information Disclosure Statement. Moreover, the process of Group II as claimed can be practiced without the specifics of the Group I apparatus such as an extruding screw having between 2 and 6 thread starts.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination purposes as indicated is proper.
